DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 23-36 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 23 recites "A computer program medium having computer readable code thereon for storing commands". Applicant discloses "a computer useable medium can include a readable memory device" and "The computer readable medium can also include a communications link,...having program code segments carried thereon as digital or analog signals". The claims do not fall into one of the four statutory categories (process, machine, manufacture, or composition of matter) because the disclosure suggests that the computer program medium includes signals.

Allowable Subject Matter

3. Claims 1-22, 37-43 are allowed. Note that "selected ones of overridden, redundant, or superfluous commands" in lines 10-11 of claim 1, lines 12-13 of claim 23 and lines 6-7 of claim 37 are interpreted as "selected ones of overridden commands, or selected ones of redundant commands, or selected ones of superfluous commands".

Response to Arguments

4. Applicant's arguments filed July 7, 2006 have been fully considered but they are

not persuasive.

Applicant argued that a physical link, which is either optical, wired, or wireless, is a composition of matter. Applicant further argued that claims 23-36 constitute Beauregard claims, and are proper under 35 USC 101.

The arguments are not persuasive because

A "composition of matter" "covers all compositions of two or more substances and includes all composite articles, whether they be results of chemical union, or of mechanical mixture, or whether they be gases, fluids, powders or solids." Shell Development Co. v. Watson, 149 F. Supp. 279, 280, 113 USPQ 265, 266 (D.D.C. 1957), aff'd, 252 F.2d 861, 116 USPQ 428 (D.C. Cir. 1958). A claimed signal is not matter, but a form of energy, and therefore is not a composition of matter.

Furthermore, in accordance with the "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" posted on USPTO Website on October 26, 2005 and published in the Official Gazette on November 22, 2005, a signal is not considered statutory subject matter. Since claims 23-36 do not preclude signals, the claims are not Beauregard claims.

The examiner suggests that applicant replace the preamble of claim 23 with the preamble that follows to put the claims in conformance with the Interim Guidelines,

A computer program storage medium having computer readable code, the computer readable code, when executed by a computer, performs the storage of dynamic snapshots of a computer system, the computer readable code comprising:

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
